

NEW NAMES IN CRYPTORHYNCHINAE
(COLEOPTERA: CURCULIONIDAE)

CHARLES S. PAPP

Laboratory Services—Entomology,
California Dept. of Food and Agriculture, Sacramento 95814

Compiling data for a "Catalog of the Cryptorhynchinae of the New World," the following necessary changes in nomenclature came to my attention.

Coelosternus fiedleri Papp, NEW NAME for *unicolor* Fiedler 1942:147, and 155-156 (not Motschulsky 1858:74) from Peru. Type in the Deutsche Entom. Inst., Berlin.

Cophes fiedleri Papp, NEW NAME for *albescens* Fiedler 1950:156-157 (not Champion 1906:611 as *Graphonotus*, transferred by Fiedler to *Cophes*) from Brazil and Colombia. Type of male in the Hamburg Museum, of female in the Deutsche Entom. Inst.; Berlin.

Cryptorhynchus fiedleri Papp, NEW NAME for *scutellaris* Fiedler 1952:22, and 33-34 (not Fiedler 1941:92) from Peru. Type in the Hamburg Museum.

Eubulus bisignatifrons Papp, NEW NAME for *signatifrons* Fiedler 1954:77 and 82 (not Champion 1905:557) from Brazil. Type in the Chevrolat collection, in the Paris Museum.

Tylodes fiedleri Papp, NEW NAME for *pulverulentus* Fiedler 1943:138 (not Montrouzier 1857:52) from Brazil. Type in Museum of Natural History, Dresden.

In 1947, when I resided in Reit im Winkl, near Munich, Germany, the late Dr. Carl Fiedler helped me to start working on Neotropical Cryptorhynchinae. The above four new names are in his memory.
